PERSONAL PROJECTS

MDSHOP

- It is an E-commerce android application which focuses on reducing the distance between customer and local shopkeeper by allowing the customer to order his grocery, items from his shop while sitting at home.
- I have used Android Studio as my main IDE and Java as my BACKEND language. To store and fetch the data I have used MYSQL database which was hosted by AWS.

Covid-19 Tracker App

- It is an android based application which enables user to see the tally of total number of cases of corona, total deaths due to corona, total recovered cases globally and countrywise and also gives rich UI using pie chart.
- I have used Android Studio as my main IDE and Java as my BACKEND language. To fetch the data from API, I have used VOLLEY library.
- Github link:- <https://github.com/divyaraj2104/Covid-19-tracker>

WORK EXPERIENCE

Android Developer Intern

Crown Software

08/2021 - 12/2021
